

Microsoft Certified Systems Associate MCSA 2000 Program

THE FACTS:

The new Microsoft Certified Systems Administrator (MCSA) on Microsoft Windows® 2000 credential will advance your career by ensuring you have the skills to successfully manage and troubleshoot system environments running on the Windows 2000 operating system.

THE GOAL:

The goal of this program is to get you up to speed on the tools and technologies required in today's challenging work environment. Equipping yourself with the right tools is important for a successful career. Becoming a networking professional, and having the MCSA certification, will ensure success and will help in building your career as an information technology professional.

MCSA on Windows 2000 Certification Benefits:

You can start receiving most of the following benefits with the Microsoft Certified Systems Administrator (MCSA) on Microsoft Windows® 2000 credential in January 2002. (MCSA Welcome Kits will start being shipped in late February 2002.):

1. **Industry recognition** of your knowledge and proficiency with Microsoft products and technologies.
2. **Access to technical and product information** direct from Microsoft through a secured area of the MCP Web site.
3. **Access to exclusive discounts** on products and services from selected companies. Current MCPs can gain access to these benefits by visiting the [MCP secured Web site \(http://www.microsoft.com/traincert/mcp/mcpsecure.asp\)](http://www.microsoft.com/traincert/mcp/mcpsecure.asp) and selecting "Other Benefits."
4. **MCSA on Windows 2000, certificate, transcript, wallet card, and lapel pin** to identify you as a Microsoft Certified Professional to colleagues or clients. Electronic files of logos and transcript may be downloaded from the MCP secured Web site upon certification.
5. **Invitations** to Microsoft conferences, technical training sessions, and special events.
6. **Free access to [Microsoft Certified Professional Magazine Online \(http://www.mcpmag.com/\)](http://www.mcpmag.com/)**, a career and professional development magazine. Secured content on the Microsoft Certified Professional Magazine Online Web site includes the current issue (available only to MCPs), additional online-only content and columns, an MCP-only database, and regular chats with Microsoft and other technical experts. Additional online benefits are available to individuals with the MCSE+ Internet, MCSE, MCSA, and MCDBA certifications. Enter the MCP secured Web site for access to the Microsoft Certified Professional Magazine Online. (All MCPs are eligible for the online magazine's secured content. Some MCPs may also be eligible to receive the print version of the magazine free; eligibility is determined by the magazine).

Microsoft Certified Systems Associate MCSA 2000 Program
